

# OPTOMAP RETINAL EXAM

In our continued efforts to bring the most advanced technology to our patients, we are proud to announce the inclusion of the Optomap retinal exam as an integral part of your exam today.

We are concerned about retinal problems including macular degeneration, glaucoma, retina holes or detachments, and systemic diseases such as diabetes, stroke, and high blood pressure. These conditions can lead to serious health problems, including partial loss of vision or blindness and often develop without warning and progress with no symptoms.

In many cases, there will not be a need to dilate after the imaging. If Dr. Squire determines that there is a need for dilation, this will be discussed during your exam.

## **An Optomap Retinal Exam provides:**

- **An eye wellness scan**
- **An in-depth view of the retinal layers (where diseases can start)**
- **An annual, permanent record of your medical file, which gives doctors comparisons for tracking and diagnosing potential eye disease**

Insurance does not cover any advanced screening technology beyond the comprehensive exam. Dr. Squire highly recommends the Optomap retinal exam for all patients. This will be done as an enhancement to the comprehensive eye exam for a fee of **\$35**.
